

## Be Aware of Fraud!

Fraud schemes are becoming very common nationwide; please be extra diligent and remember these facts!

If someone calls you claiming to be:

- your internet/computer security software provider;
- Amazon/other merchants; or
- the IRS/ Social Security Administration:

**HANG UP! They will never call you.**

If someone calls you saying they need to access your computer: **HANG UP! Never let anyone access your device.** There is never a need for someone else to log into your computer.

If someone calls you saying they need your online banking Login ID and Password or need to access your online banking through your computer/device: **HANG UP! The bank will never ask for your password.**

If someone calls you claiming you owe money to them or a government organization, and if you do not pay you are going to jail: **HANG UP! This is a scare tactic.**

If someone calls you saying you need to:

- send them gift cards;
- wire the funds 'they just deposited into your account'; or
- send them money in an emergency:

**HANG UP! This is true fraud.**

Please feel free to contact the bank with anything that feels suspicious, scary, or a little odd! We are here to educate you and protect you and your funds!
